

WCAG 2.5.2 Test - Mouse Down Piano

TEST CASE: the sound is deliberately triggered on Mouse Down.

Press and hold a piano key with the mouse. The sound starts immediately on Mouse Down. This is intentional test content for WCAG 2.5.2 (Pointer Cancellation). Problemas:

- a) el sonido no arranca inmediatamente (Acrobat tiene que decodificar el WAV)
- b) esto funciona solo en el lector de Acrobat (indicado para test de accesibilidad de PDF)
- c) antes de que funcione el mouse Down hay que hacer un click completo (Down+Up)

Expected test behavior

1. Mouse Down -> sound starts immediately.
2. Mouse Move away -> test cancellation.
3. Mouse Up -> completes activation.
